

Safest Car Ever!

That is what Lake Oswego Model 3 owner, Davina Doby, can testify to first hand. She and her Model 3 were recently broad sided by a semi-truck. Her Tesla was clearly damaged but she was not hurt at all. In fact Tesla quickly confirmed over the Internet that her car was safe to continue driving.

Testing by the U.S. National Highway Traffic Safety Administration ([NHTSA](#)) and European New Car Assessment Programme ([Euro NCAP](#)) back up that claim. NHTSA gave the Model 3 there highest rating, 5 out of 5 stars. Indeed NHTSA data shows that the Model 3 has the [lowest probability of injury](#) of any car they tested.

So EVs are not only fun to drive, less costly operate but also the safest car you could currently own.
